

International Aviation Insurance Course

Agenda May/June 2018
Auditorium, The Willis Building

On behalf of the Willis Towers Watson Aerospace team, I welcome you to our International Aviation Insurance Course.

In our business partnership we share the same, rapidly evolving risk environment. As a world leading aviation broker, we recognise the need to understand, articulate and proactively respond to that shifting landscape by shaping solutions to meet your needs.

To that effect, over the next four days, we'll be covering a wide spectrum of risks and outlining the innovative solutions available to you.

This year as a team exercise, we will be encouraging you to set up your own airline (imaginary in this instance!) and as the course progresses, you will see how decisions made during your company's development will affect its risk profile and the actions you may need to undertake.

Naturally during and after completing the seminar, our team will be happy to respond to any questions you may have. We intend the days you spend with us to be as collaborative as possible and welcome your contribution

John Rooley, CEO Aerospace

Day One: Monday 21 May/18 June

- 09.15** Registration and coffee
